Kelly Riepma, Public Works Superintendent, 360.914.1154
publicworks@townofcoupeville.org
Questions about parks, streets, and water, sewer and storm water issues

TREE ROOTS AND YOUR PIPES

Landscape and Plant wisely!

Beautifully landscaped yards can be a joy to homeowners but can turn into expensive nightmares. Roots from trees and shrubs can invade sewer lines. The best way to avoid this situation is to plant wisely. Here are some tips for taking care of your sewer line:

- Do not plant trees or shrubs within the right-of-way or 20 feet from any sewer line or sewer main. That small little twig you plant today can grow into a big expensive tree in a few years.
- Please do not use root-killers containing copper sulfate. They are not effective and adversely affect the treatment process at the wastewater plant.
- If your plumber has to cut roots from, or snake your sewer line please call 360-914-0314 to report it. Town staff will make sure the roots or clog your plumber has dislodged does not cause a problem for your neighbors downstream.
- Remember to call 411 for a utility locate before doing any digging. It's safer and more efficient to know where the underground utilities are before digging, than to have to repair them.

STAY INFORMED

If you would like to be added to the Town email list, please drop Kelly Beech a note at clerktreasurer@townofcoupeville.org. We will send you agendas and minutes from Town meetings, emergency updates, and important Town information. We will not fill up your email with junk, promise!

THANK YOU FOR MOWING!

Thanks to all the Town residents who are maintaining their right-of-way. The Public Works staff appreciates your help during the busy mowing season.

TALL GRASS AND WEEDS

Just a reminder that grass and weeds above 12" tall must be mowed. This time of the summer, tall grass and weeds becomes a fire hazard, not to mention looks unsightly. Your neighbors thank you!

CRAB POT LINES

Washington State Ferries asks that crab pots not be placed in the ferry lanes of travel. Lines from the pots becomes entangled in the boat propellers and cause a lot of damage as well as taking ferry's off line. Thank you for your help and good luck crabbing!

2017 ANNUAL WATER QUALITY REPORT

The report is posted at:
